RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which in its composition, differs essentially from all other artificial productions for a similar purpose—Flint forming the basis. In character, texture, and appearance it is made to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest sandstone and to possess all their valuable and enduring properties, without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, fountains, balustrades for terrace walks, vases and pedestals, &c., &c.; also, for all varieties of plain and ornamental flooring. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as ordinary cement. Copies of Busts, Statuary, or other Works of Art, can be produced in the finest Patent Stone as faithfully as in Plaster of Paris.

IMPORTANT to WATER COMPANIES, MANUFACTURERS, and the PUBLIC.—RANSOME and PARSONS beg to call the attention of Water Companies, Manufacturers, and others to their PATENT STONE FILTERING SLABS, which are capable of filtering from 100 to 500 gallons of water per superficial foot per day, with a head of water varying from 3 to 4 feet. These slabs can be produced to any required dimensions, and, consequently, can be adapted to any cistern, tank, or reservoir. By a simple precautionary arrangement, they are prevented from being in any way choked or impeded in their action. Price 1s. per superficial foot.—Full descriptions and prices of their other descriptions of filters will be supplied on application.

IMPORTANT to BRICKMAKERS and CONTRACTORS.—RANSOME and PARSONS are also the proprietors of HALL'S PATENT BRICK-MAKING MACHINE, capable of moulding 10,000 bricks per day and upwards, which are superior to those manufactured by hand, and are produced at considerably less cost.—Communications to be addressed to the Patentees, Messrs. RANSOME and PARSONS, Flint Wharf, Ipswich; or to 103, Newgate-street, London.

TERRA-COTTA, as exhibited in Class 27 at Great Exhibition Building, noticed by the Editor of The Builder, and illustrated in the July number of the Art Journal.

W. BLANCHARD, late of Coade's original works, begs to invite attention to this invaluable material, that has been and is now successfully adopted by our eminent architects and others in the adornment of our noblest buildings. Nearly [illegible] years have elapsed since its introduction into this country, and works of those times can be referred to, which will prove the imperishable nature of the material, and will be found to retain all their primitive sharpness, unimpaired by the ravages of time.

Groups, statues, friezes, capitals, panelling, pinnacles, fountains, terminals, Tudor and other chimney shafts, balustrading, [illegible], fonts, tazzas, vases, coats of arms, [illegible] ornaments, ridging, and every description of architectural ornament, at prices, in many instances, nearly half the cost of the perishable stones.

PORTLAND CEMENT, in Casks of Four Imperial Bushels. QUANTITY, NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack, combined with which its eminent hydraulic properties stamp it at once as the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by B. GREAVES, Esq., at his Works, near the River Avon, and sent to all parts of the Kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. beg to refer to No. [illegible], page [illegible]; and also Nos. [illegible] and [illegible], pages [illegible] and [illegible], of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, oxydate, or turn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 40, Hanover-street, Liverpool.

ROMAN and other CEMENTS.—Manufactured by J. M. BLASHFIELD, successor to the patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT, which has now for upwards of fifty years been extensively used in most of the public and private buildings and other works in this country and throughout the world. Among the more recent works in this country where it has been largely employed since the present proprietor became the manufacturer, may be named the Lyceum and St. James's Theatres, the Carlton, Reform, and Army and Navy Club Houses, the London Docks, the Thames Tunnel, the Winter Palace, St. Petersburgh, the British Museum, the York Minster, the Royal Exchange, the Nelson Column, and the New Houses of Parliament. When properly applied, it is the most perfect and economical Cement for hydraulic works known; and, when used as a stucco, it will resist the action of heat and frost, and preserve walls from damp. As a mortar for brickwork, it surpasses any other material, and is NEARLY AS CHEAP FOR SUCH WORK AS MORTAR MADE OF ORDINARY LIME. Tarras, an Hydraulic Lime, for setting masonry where slow induration is important, so as to allow for the settlement of work. A Cement of extraordinary tenacity and hydraulic properties, and with which the most [illegible] works in Lancashire have been executed. Hamelin's Patent Mastic, or Oil Cement, which may be painted immediately after use. Also Martin's Cement, Keene's Cement, Portland Cement, Genuine Plaster of Paris, prepared from the purest gypsum, and of any degree of fineness required. Chimney-pots, Trusses, Paving Tiles, &c.—Manufactory, Mill-wall, Poplar. Depôts, Commercial-road, Lambeth, and Paddington-basin.
